

Nested if-else Statement

Task 1 — Age Category Checker

Create an app where the user enters age.

Conditions:

- If age ≥ 18 :
 - If age $\geq 60 \rightarrow$ “Senior”
 - Else $\rightarrow$ “Adult”
- Else:
 - If age $\geq 13 \rightarrow$ “Teenager”
 - Else $\rightarrow$ “Child”

Task 2 — Simple ATM System

Input:

- PIN
- Withdrawal amount

Conditions:

- If PIN is correct:
 - If balance is enough $\rightarrow$ “Transaction Successful”
 - Else $\rightarrow$ “Insufficient Balance”
- Else:
 - “Invalid PIN”

Task 3 — Weather Recommendation

Input temperature.

Conditions:

- If temperature > 25 :
 - If temperature $> 35 \rightarrow$ “Very Hot”
 - Else $\rightarrow$ “Warm”
- Else:
 - If temperature $< 10 \rightarrow$ “Cold”
 - Else $\rightarrow$ “Cool”

Nested for Loops

Task 4 — Star Pattern

Display:

```
*  
**  
***  
****  
*****
```

Task 5 — Rectangle Pattern

Display:

```
*****  
*****  
*****  
*****
```

Use nested loops.

Task 6 — Number Grid

Display:

```
1 2 3  
4 5 6  
7 8 9
```

Enhanced for Loop

Task 7 — Fruit List

Store fruits in an array and display all fruits using enhanced for loop.

Example:

```
Apple  
Banana  
Orange  
Mango
```

Task 8 — Even Numbers Sum

Store numbers in an array.

Use enhanced for loop to calculate the sum of even numbers only.

Task 9 — City Names Viewer

Store 5 city names in an array and display them using:

```
for (String city : cities)
```
