

Mobile Programming

FULL NAME	QUESTIONS
1. GALBADRAKH MISHEEL 2. LIU HONGJUN 3. BATSAIKHAN AZZAYA 4. KHASANOV SAYFILLO TULKIN UGLI 5. SUBEDI BINAYA 6. XIAO JIAN 7. WANG DUO 8. BAATARCHULUUN UYANGA 9. BATSUKH BAT ERDENE	Theory Question: 1. Explain the difference between Widening Type Casting and Narrowing Type Casting in Java. Give one example of each and explain why narrowing casting may cause data loss. Coding Question: 1. Grade Calculator Write a Java program that: • Takes a student's name and score as input. • Assigns grades: ○ A (90–100) ○ B (80–89) ○ C (70–79) ○ D (60–69) ○ F (<60) Prints the student's name, score, and grade. 2. Array Statistics Create an integer array: <pre>int[] numbers = {12, 45, 7, 89, 23, 56};</pre> Write a program to: • Print all elements using a for loop. • Find the largest number. • Calculate the average value.

1. AMARJARGAL OYUNZUL 2. ZHOU ZIXUAN 3. BATBILEG SOLONGO 4. KHAMRAKULOV YORKINJON JAKHONGIR UGLI 5. GHIMIRE PRATIK 6. TUVSHINJARGAL TOGTOKHTUR 7. SILWAL SAIMAN 8. NASANBAT TEMUULEN 9. ABBAS LUBNA 10. KHANAL BINOD	Theory Question: 1. Compare Native Mobile Application Development and Cross-Platform Mobile Application Development. Discuss: • Definition • Advantages • Disadvantages • One example technology for each Coding Question: 1. Library System. Create a class Book: <pre>String title; String author; boolean isAvailable;</pre> Requirements: • Constructor • Method displayBook() • Create 3 books and display all information. 3. 2D Array Processing Given: <code>int[] [] matrix = {</code> <code>{12, 5, 8},</code> <code>{7, 15, 20},</code> <code>{4, 11, 9}};</code> Write a program that: ● Prints all elements using nested loops. ● Finds the largest value. ● Counts how many values are greater than 10. Write a program that: • Prints all elements using nested loops. • Finds the largest value. • Counts how many values are greater than 10.
---	--

1. HUANG FEIHONG
2. DASHDORJ URANGOO
3. TRAN NGOC SON
4. K ZIN PO HTET
5. BATBILEG ANUJIN
6. GANPUREV TENGIS
7. BISHWOKARMA SISIR
8. BEKMIRZAEV
SALOHIDDIN AZIZBEK
UGLI
9. MUNKHZOLBOO
TSOLMON
10. TUMURBAATAR
AMARSANAA

Theory Question:What are the advantages and disadvantages of Object-Oriented Programming (OOP)? Discuss at least three advantages and two disadvantages.

Coding Question 1: String Analyzer

Input a sentence from the user and:

- Print the sentence in uppercase.
- Print the sentence in lowercase.
- Print its length.
- Check whether it contains the word "Java".

Coding Question 2: Even Numbers and Sum

Write a Java program that:

- Uses a while loop.
- Prints all even numbers from 1 to 100.
- Calculates and prints their sum.

1. GANBOLD ENKHJIN 2. ERDENETOGTOKH DULGUUN 3. KOMILJONOV RAHIMJON AZIZJON UGLI 4. KHADBAATAR BAT ERDENE 5. POKHREL DIPESH KUMAR 6. NASANJARGAL KHANGAIBAZAR 7. CHO CHO NYEIN CHARM 8. SHUKIRILLAEV MUKHAMMADSODIK SHERZODBEK 9. NAMJILDORJ IVEEL	Theory Question: Explain the following OOP concepts: • Class • Object • Constructor Provide a simple example for each. Coding Question 1: Simple Calculator Write a Java program that: • Takes two numbers and an operator (+, -, *, /) from the user. • Uses a switch statement to perform the operation. • Displays the result. • Prints "Invalid operator" for any unsupported operation. Coding Question 2 : Student Object Create a class Student with: <pre>int id; String name; double gpa;</pre> Requirements: • Constructor • Method displayInfo() • Create 3 Student objects. • Print information for all students.
